| Weight:              | 28 g (1 oz.)                                      |

## Features

- The Galaxy Standard IP Speaker Call Switch is a wall mounted, dual button call switch.
- This Call Switch allows a user to send a signal to a controlling device to initiate any action that the controlling device is programmed to initiate. When a button is pressed, a dry contact is closed sending that contact closure to the controlling device.
  - The same functionality exists for each of the 2 buttons.
